TO ALL INTERESTED ECONOMIC OPERATORS

Subject: Clarification of the Invitation to Initial Bid, ebp: 377/23/SK

The Seller received an enquiry with the following content from a potential bidder:

„Since our company has a real interest in participating in the auction, please inform us whether the offered wagons type cistern Zas-z in the condition in which they are at the time of their offer, the same can transport liquid fuels such as gasoline, diesel, kerosene and motor oil.

We kindly ask for your quick response, in view of the short time we have for preparation and submission of our documents for the announced tender.”

The Seller's answer is as follows:

The mentioned wagons series Zas-z are primarily intended for the transportation of food products (edible oil, sugar molasses...).

The wagons have the interior of the tank painted with a protective layer of PVC. On 24 wagons have expired REV and are out of use and 11 wagons are in traffic.

Sincerely,

Chief Executive Officer

Dragan Marčinko
