Case: Clarification of the Invitation to submit an offer, prn: 2-JPP/24/SK

The Client received an inquiry with the following content from a potential bidder:

„We are planning to submit our offer for the HŽ Cargo tender number 2-JPP/24/SK for the procurement of 180-270 freight wagons of the T series.

I have a question regarding the conditions from the invitation to submit an offer under point 1.5 Place, deadline and method of delivery:

- It was stated in the call for tenders that "The place of delivery of freight wagons at DDP parity (delivered with customs clearance) is the Republic of Croatia according to Incoterms 2020, and collection at the bidder's facility."
- From the above, it is not clear where in the Republic of Croatia the wagons should be delivered to after being picked up at the supplier's facility!?
- In our case, can the place of delivery be considered the railway station in Slavonski Brod, where we, as a potential supplier, are located?
- If it is considered that the wagons have to be delivered to another station outside Slavonski Brod, the price of the transport to the destination station should also be included in the bid price (in that case, we would again ask HŽ Cargo for a transport offer, e.g. SB-ZG).“

The Client's response is as follows:

The wagons will be delivered in the stations of the main (corridor) railroad RH1, RH2 if the Infrastructure Manager in the territory of the RH allows.

If permitted by HŽ-Infrastruktura d.o.o., the delivery station can also be considered the railway station in Slavonski Brod.

Sincerely,

MANAGEMENT - DIRECTOR

Dragan Marčinko
